PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building production web apps in real estate, education, and health-tech using React.js, Next.js, Tailwind CSS, and Webflow. Skilled in AI service integration, REST APIs, CMS platforms, and translating Figma designs into responsive, performant interfaces.

SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS, Tailwind CSS, Webflow

Integrations & CMS: REST API Integration, Prismic CMS, AI Feature Integration

Tools & Workflow: Git, GitHub, VS Code, Figma, Responsive Design, Performance Optimization, Webflow, AI Automation Tools

Concepts: Component Architecture, UI/UX Implementation, Cross-Device Compatibility, ATS-Ready Code

PROJECTS

Simpa.shiksha | *React.js, Next.js, Prismic CMS, REST API*

simpa.shiksha

- Architected and developed a full-stack education platform using Next.js with Prismic CMS integration, enabling dynamic content publishing without developer intervention.
- Built multiple server-side rendered (SSR) dynamic pages with API-based content fetching, improving page load performance and SEO indexing.
- Implemented fully responsive layouts across mobile, tablet, and desktop, ensuring consistent UX across all device breakpoints.
- Reduced content update cycles by enabling non-technical stakeholders to manage pages directly through the CMS.

Propperam.com | *React.js, Tailwind CSS, JavaScript*

propperam.com

- Developed the complete frontend of a real estate platform from the ground up, building a scalable, reusable component library that accelerated feature delivery.
- Implemented responsive grid-based property listing layouts optimized for mobile-first browsing, improving discoverability across devices.
- Optimized asset loading and rendering pipeline, reducing page load time and enhancing Core Web Vitals scores.
- Built modular architecture with reusable UI components, enabling future feature additions with minimal code duplication.

Ayurvedum.com | *React.js, Tailwind CSS, JavaScript*

ayurvedum.com

- Developed the complete frontend of an Ayurveda health-tech platform, focusing on accessibility and usability for a diverse, non-technical user base.
- Applied modern UI design principles to deliver a visually consistent and intuitive interface, improving user engagement.
- Ensured WCAG accessibility standards were met, broadening the platform's reach to users with varying accessibility needs.

EXPERIENCE

Frontend Developer Intern

Remote

Upbott.ai

2025

- Built and maintained responsive UI components for a production AI web platform using React.js and modern CSS frameworks, serving real end-users.
- Integrated AI-powered backend services with the frontend layer via REST APIs, enabling seamless AI feature delivery within the user interface.
- Collaborated cross-functionally with backend engineers to align API contracts and resolve integration bottlenecks, reducing frontend-backend friction.
- Refactored legacy UI components to improve code readability, reduce render overhead, and enhance overall application performance.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & IT

Jun 2022 – May 2026

IPS Academy, Indore

CGPA: 7.8
